

Sri Yokesh Shanmugamurthy

Senior Product Designer

Summary

Senior Product Designer experienced in delivering enterprise SaaS products and designing complex data-driven workflows. Skilled in leading end-to-end product design, driving product discovery, and building scalable design systems. Adept at translating user needs and business goals into intuitive, impactful experiences through research, interaction design, and close collaboration with cross-functional teams.

Experience

Senior UX Designer | 03/2021 – Present

Precisely, Ireland

Leading UX design for enterprise B2B SaaS Data Catalog and Governance products used by data analysts and governance teams. Designing complex governance and data discovery workflows in collaboration with Product Managers and Engineers.

Conducting user research, usability testing, and designing interaction flows, wireframes, and prototypes in Figma to validate solutions. Contributing to the design system and designing AI-assisted features that automate governance workflows and surface insights for users.

User Interface Designer | 12/2016 – 07/2018

Stradegi Solutions, India

Designed user interfaces for fintech solutions, focusing on clarity, usability, and seamless user experiences. Collaborated closely with product managers and developers to deliver polished, responsive applications tailored for financial users. Enhanced user engagement and satisfaction through iterative design improvements based on user feedback.
